

# Prepare your facility for today's needs — and tomorrow's.

Go beyond efficiency with the latest innovation from FSC Lighting: the newly patented PowerPlus technology.

PowerPlus transforms FSC Lighting fixtures into ports that power electronics, including IoT devices. Simple, versatile and efficient — just plug in, power up and get connected.

## FSC LIGHTING MEETS POWERPLUS

### LOGISTICS WAREHOUSES

Romeoville, IL

#### LEHB Series LED High Bay with PowerPlus

This customer's two facilities—totaling 1.2 million square feet—don't just have clean, safe, energy-efficient lighting from FSC— they reduced installation costs by incorporating PowerPlus. These fixtures power RFID readers and have the capability of powering security cameras, WIFI hotspots and asset tracking devices.

### HOSPITAL PARKING STRUCTURE

Torrance, CA

#### CPC-L8500 Series LED Peaked Strip with PowerPlus

A PowerPlus integration enabled this customer to combine daylight harvesting and occupancy-based control sensors, helping maintain a well-lit, safe parking structure and save on energy costs. With PowerPlus, these custom designed luminaires can easily power parking guidance systems and security cameras.

# HOW IT WORKS

PowerPlus modules are installed in FSC Lighting fixtures internally or in an external box mounted at the end of the fixture. Secondary devices like security cameras, RFID readers and parking guidance systems are then physically connected to the fixtures via cord and plug, hardwire or POE injector. PowerPlus can be installed in all or just some fixtures.

## DEVICES

Security Cameras

RFID Readers

Wi-Fi Hotspots

Asset Tracking Devices

CO2 Monitors

Parking Guidance Systems

## LOCATIONS

Parking Garages

Warehouses

Retail Stores

Manufacturing Facilities

Food Processing

## BENEFITS

- Future-proof (prepares facilities for tomorrow's needs)
- Fewer pipes and wires
- Less "home run" wiring (the wiring of a circuit to a centralized power distribution point)
- Reduced labor costs
- IoT ready
- Aesthetically pleasing
- Instantly makes a facility more dynamic
- Relocatable power source
- Convenience outlet
